

## ELITechGroup Real-Time PCR Proprietary Technologies

### MINOR GROOVE BINDER (MGB®)

Synthetic molecule attached to the 5'-end of MGB® DNA probes, that binds in the minor groove of hybrid DNA molecules

- Increase stability of hybrid DNA enabling the design of shorter probes for excellent specificity and sensitivity polymorphisms discrimination
- Identify emerging mutations and reliably discriminate variants
- Increase Tm reproducibly in A-T and G-C rich regions
- Enable reliable, clear and unambiguous meltcurve analysis

### ECLIPSE® DARK QUENCHER

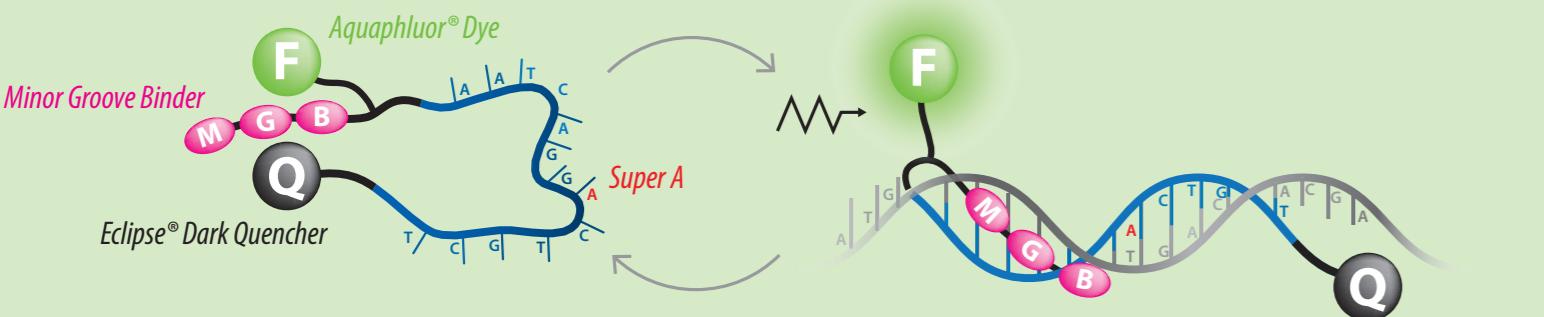

Absorbs the fluorophore energy and dissipates it as heat; while a typical quencher re-emits part of the energy as light

- Improve absorbance of fluorescence emitted from dye reagents
- Decrease background level of fluorescence
- Improve PCR assay sensitivity
- Cover 4 spectra wavelengths

### ELITe MGB® PROBES\*

Proprietary probes concentrating all ELITechGroup PCR technologies, designed with Minor Groove Binder (MGB®), Eclipse® Dark Quencher, AquaPhluor® Dye and Superbases®

- Very low background and high hybridization-triggered fluorescence
- Unique quenching effects with the combined action of MGB® and Eclipse® Dark Quencher
- Exceptional specificity from shorter length probes with the MGB® moiety
- Improved sensitivity by combining the strong hybridization signal with low background
- Melt-curve analysis capability

\* Luctanov, Nucleic Acids Res. 2007; 35 (5)

### AQUAPHLUOR® DYE

Fluorescent compound re-emits light upon light excitation

- Optimize detection with the comprehensive range of 25 different colors from UV to far-red developed
- Utilize dyes perfectly adapted to multiplexed assays

### SUPERBASES®: Super A, Super T, Super G, Super I and Super N

Engineered nucleotides selectively used to optimize primers and probes design

- Enhance A-T stability (e.g. rich A/T domains)
- Reduce secondary structure (e.g. GG self-association) and fluorescence quenching
- Confer close Tm value when paired with any bases

## About ELITechGroup

A pioneer in PCR technologies for more than 30 years, ELITechGroup is a leading PCR innovator with the revolutionary Minor Groove Binder (MGB®) technology and has become today a global solution provider for Molecular Diagnostics.

Our innovation culture, combined with the highest manufacturing quality standard and long-lasting collaborations with customers and international working groups enables us to design and manufacture superior CE-IVD Real-Time PCR assays with unsurpassable performance for laboratories and clinicians.

### High value diagnostic solutions for better medical decisions

Transplant Pathogen Monitoring

Healthcare Associated Infections

Respiratory Infections  
Sexually Transmitted Infections

Meningitis

Genetics

Oncohematology  
Gastrointestinal Infections

### HIGH PERFORMANCE

assays for infectious diseases, Genetics & Oncohematology testing

**LEADING** quantitative & multiplex assays for *in vitro* diagnostic

**SIMPLIFIED** workflow in combination with the ELITe InGenius® system

ELITechGroup is certified by DEKRA and applies a quality management system in compliance with ISO 9001:2015 and EN ISO 13485:2016
